

## Micro Messier Observing List

### “Deep Sky” Astronomical Objects for Absolute Beginners

*Ten easy-to-find star clusters, nebulae, and galaxies that you can observe with binoculars.*

	Object	Con.	Type*	Name	Date	Time	Instrument	Description	√
<b>WINTER</b>	M45	Tau	OC	Pleiades					
	M42	Ori	EN	Orion Nebula					
<b>SPRING</b>	M44	Cnc	OC	Beehive Cluster					
<b>SUMMER</b>	M13	Her	GC	Hercules Cluster					
	M8	Sgr	EN	Lagoon Nebula					
	M20	Sgr	EN	Trifid Nebula					
	M17	Sgr	EN	Omega Nebula					
	M11	Sct	OC	Wild Duck Cluster					
<b>AUTUMN</b>	M31	And	G	Andromeda Galaxy					
	NGC 869/884	Per	OC	Double Cluster					

\*OC = open cluster   GC = globular cluster   PN = planetary nebula   EN = emission nebula   G = galaxy
